## About the game

This quiz game consist of only one round with a total of ten questions. The question will be displayed on the question panel on the top of game board. Each question has four options among which one option will be the right answer. Your objective is to click on the right option which you think correct answer. If your choice is right, the option background changes to green and at the bottom score panel your score increases by one point and the CORRECT notification displays at the result panel below. If your choice is wrong the background do or of your option turns to red, you won't be given any points and the result panel shows wrong. You can go to next question by clicking on the NEXT button below the score panel.
